YOUR ONE  FOR FILTERS

HWFS House Water Filtration System

Models HWFA-110S, HWFA-110, HWFA-120, HWFA-120BB

Water sources are becoming more and more polluted with chemicals, bacteria, toxic metals and other contaminants despite industrial methods of water treatment in residential areas.

It is up to each individual to improve the quality of water in their homes. Precision Filtration Products' goal is to help make your life easier by offering the **HWFS Whole House Filtration System**.

Our **HWFS Whole House Water Filtration Systems** filter all the water in every outlet in your home. The **HWFS** is designed to remove sediment, dirt, and rust particles. We also offer a complete range of whole house water filter packages for the removal of chlorine, chloramine, cysts, VOC's, iron, hydrogen sulfide (rotten egg smell), certain heavy metals, and a wide range of contaminants responsible for bad taste and odors in residential water supplies.

Now you can enjoy high quality water for drinking, cooking, bathing, plants and more. Your water-using appliances such as washing machines, hot water heaters, coffee makers and more will last longer, too.

For city water, you can filter chlorine, chloramines, heavy metals, VOCs and more. You'll be amazed at the difference a whole house water filter will make in your home.

Our **HWFS Whole House Water Filtration Systems** utilizes 2-Stages. The first usually serves as a sediment filter to rid the water of large particles and sediment (sand, dirt, debris, etc.). The second (usually an activated carbon filter) provides finer filtration and absorbs chlorine and other contaminants that effect water taste and odor. Additional elements can be added to the system to reduce/remove special contaminants such as iron, manganese and hydrogen sulfide (iron / Hydrogen sulfide reduction

Features:

- 2-Stage 20" heavy duty housing with pressure relief valve
- Sturdy mounting bracket
- NSF certified housings
- NO backwashing or media regeneration required!
- NO added harmful bi-products to your drinking water
- Relatively long filter life - cost effective long-term operation
- Simple installation - either unit includes (2) 3/4" Brass Shut-Off Valves
- Small size - save valuable floor space!
- High flow design and low pressure drop
- Easy to replace filters - handy spanner wrench included with all systems

If you have a well, our optional **HWFA Ultraviolet Unit** is ideal when combined with the **HWFS Whole House Water Filtration System**. The **HWFA-110S**, **HWFA-110**, **HWFA-120**, and the **HWFA-120BB** are effective at protecting potable drinking water sources from occasional intrusion of microbiological contamination. This positive alternative to environmentally harmful chemicals uses ultraviolet light to control microbes. The **HWFA UV Unit** offers a High-intensity UV output for supplemental microbiological control in drinking or process water and Positive alternative to environmentally harmful chemicals.
