Horizontal Coalescer Separators for Mobil Equipment API-1581, Category C, Type S & SLD, 5th Edition

HCS Series (End Opening)

Facet HCS Series (end opening) two-stage horizontal coalescer separator housings are mechanical devices to filter solids and separate water from fuels where water content is a problem. They have been qualified after full-scale, witnessed testing to the Fifth Edition of API Bulletin 1581. Using Facet high quality coalescer and separator cartridges, they provide the best water and solids removal.

RELIABLE PERFORMANCE

Facet coalescer separators are a result of over 50 years of continuous research and development to meet the ever demanding performance requirements in the aviation fuel handling industry. This, along with proven field performance, demonstrates Facet's ability to provide quality products that meet current specifications as well as specific customer requirements for installations in refineries, bulk storage, terminals, heliports, airports, etc.

STANDARD HOUSING DESIGN

- Welded carbon steel construction—other materials available on request
- ASME Code, Section VIII construction, stamped and certified
- Design pressure: 150 psi @ 250°F—other design pressures available on request
- Inlet, outlet and drain connections permanently marked
- Interior: Epoxy coated (MIL-C-4556)
- Exterior: Prime coated
- Swing bolt head closures
- Hinged end opening cover furnished on 24" (610 mm) OD and larger
- Victaulic inlet and outlet connections
- Buna-N o-ring closure seal
- Choice of rod or screw base coalescer cartridge mounting styles
- Knife edge cartridge mounting seals
- 4" inlet/outlet cleanout/inspection connections (when permitted by design)
- Spider plate attached to vessel wall

OPTIONS

- * Water defense system
- * Automatic air eliminator with check valve
- * Pressure relief valve
- * Differential pressure gauge
- Pilot control valve
- Blind cover for pilot control mounting flange
- Sampling probe

(* Mandatory for 5th Edition)

Due to our continuing program of improvement, specifications are subject to change without notice.

All dimensions, weights and volumes are approximate and are for estimating purposes only.

REFERENCE NOTES:

- (1) Model numbers include housing and required cartridge mounting.
- (2) Dimensions are based on standard 150 psi housing design
- pressure, are approximate and should not be used for installation purposes.

NOTES:

- a. All elements are mounted against knife edge seals.
- b. Nameplate to be stamped with API classified data.
- c. Inlet chamber to be hydrostatic tested at 115 psi.
- Coalescer cartridges are offered with a choice of rod or screw base mounting. The suffix "SB" will be added to the coalescer model number when screw base is required.
 Example:CAA33-5 = Rod Mount

CAA33-5SB = Screw Base

Due to our continuing program of improvement, specifications are subject to change without notice.
